5 **Antonio Carbajal-Benitez** was awarded the DCSW scholarship and is majoring in Electronics Engineering.

4 **C. J. Martin** graduated as an Academic All-American in the Spring and earned a scholarship to attend Georgia Southern Univ.

3 **Trae Maeler** is president of the Student Government Association. She is pursuing an Associate of Arts Degree.

2 **Kennie Eberhardt** graduated in the Spring and earned a full scholarship to Lynn University in Boca Raton, Florida.

1 **Catoe White** earned a basketball scholarship for his freshmen year and is playing guard for the ATC Knights.

6 **Merriah Brady** is a former Treasurer of the SGA. She suspended her studies to serve her country and is currently training as a combat medic.

7 **Tamell Bailey** graduated last Spring with a degree in Electronics Engineering and is now an ISM technician at ATC.

8 **Greg Henderson** served as the Phi Theta Kappa Honor Society's president last year.

9 **Sarah Anderson** won several scholarships last year and was named the "Outstanding Nursing Student" for 2006.

10 **Christina Smith and Stephanie Bell** are pursuing Associate Degrees in Nursing. They anticipate graduating in Spring 2007.

President's Message

From its genesis, Aiken Technical College committed its resources to growing prosperity for the citizens, businesses and industries of the Central Savannah River Area.

In recent years, the College has made significant progress toward establishing an infrastructure that can build the skills of our emerging and existing workforce. In 2006, we took full advantage of those assets:

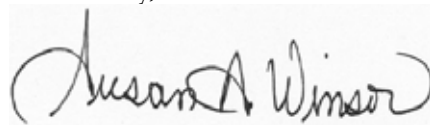

Our health programs continued to grow in order to address a statewide shortage of healthcare workers. Our computer technology students explored cutting edge software applications in our information technology classrooms and labs.

Workforce and Business Development students chose new careers or gained further training to benefit them in existing jobs. Students seeking associate degrees found strong core academic instruction that will allow them to take the next steps of their educations with confidence, or to enter the workforce, if they so choose.

Now a new study has proven the value of our efforts. Business and industry in the CSRA have listed a skilled workforce and the availability of quality worker training programs at ATC and partner agencies as high among the factors they consider when making capital investments in our area.

This is wonderful news, but we mustn't slow our efforts. Recent layoffs and industry closings have cost thousands of jobs in Aiken County alone. We must continue to leverage the resources that will best position us to meet these potential problems head-on. Working together with our community partners towards this united purpose, Aiken Technical College will continue to fulfill its mission of developing educated, engaged and employable individuals who will help grow prosperity throughout the CSRA

Sincerely,

Susan A. Winsor
President

Community empowerment is something we take very seriously at Aiken Technical College. The College is more than an institution of higher learning; it also serves as a vehicle for sustainable economic development and a provider of strategic vision for the people it serves.

Recognizing the growing popularity of fast pitch softball in Aiken and its surrounding counties, ATC offered a pair of fast-pitch camps for young women athletes in the summer of 2006. An All-Skills Camp designed for young women between the ages of 8 and 13 taught softball basics. It was followed by a more intense Advanced Camp for athletes between the ages of 14 and 18.

Give Kids A Smile, a free day of dental care for children, was held in the clinic of the Health and Science Building during the winter of 2006. "Give Kids A Smile" is a project of the South Carolina Dental Association in coordination with the dental education departments of the technical colleges of South Carolina, the Medical University of South Carolina, and Palmetto Health Hospital. The service provides much-needed dental care to eligible children between the ages of six and seventeen. The project also afforded ATC dental assisting students a valuable service learning opportunity when they volunteered during the clinic.

USC Aiken and ATC together hosted "Martin Luther King, Jr.: Remembering His Dream and Honoring the Man Through Music," at its annual Martin Luther King Day observance. ATC President Dr. Susan A. Winsor and USCA Vice Chancellor of Student Services Dr. Deborah Kladviko served as guest speakers. "Brothers in Christ," featuring Donquell Sims and Aaron Thomson of ATC, and Karen Gordon and Michael King of "Quiet Storm" performed musical selections. Spoken word artist Willie "Alma" Finnie also performed.

The third annual Career Quest came to ATC in the spring of 2006 in the Gregg-Graniteville Student Activities Center. All of Aiken County's middle schools participated, sending hundreds of students to the campus to interview a variety of business, industry and government officials, including representatives of agriculture, architecture and construction, business management and administration, health science, engineering, law and public safety, tourism, government administration, and much more. Students also had the opportunity to explore educational opportunities at ATC and USC Aiken. Career Quest is a project of the Lower Savannah Council of Governments, Public Education Partners, South Carolina Higher Education Awareness Program, Aiken Regional Medical Centers, Aiken County Education and Business Alliance, Kellogg, Washington Savannah River Company, ATC, University of South Carolina, Aiken, and Aiken County Public Schools.

Students in ATC's Massage Therapy Program offered welcome relief to rowers who participated in a spring regatta on Langley Pond. The students had a steady stream of clients all day as tired rowers came off the water. Massage therapy students also offered their skills at other community events, including the ATC Foundation's Friendraiser Golf Tournament.

Leadership Aiken County visited ATC in the spring of 2006 to learn about the campus and how programs here benefit the community. Many participants had never visited the campus before, and were impressed by its size and the diversity of programs offered.

The Aiken Standard newspaper brought home economist Michelle Roberts to ATC to celebrate Taste of Home, a popular cooking school that attracted more than 400 people to the campus in 2006 to enjoy cooking demonstrations, taste samples, and win door prizes.

ATC hosted its third Mathcounts in 2006. Teams from 12 local schools participated in the competition that promotes math excellence among middle school students. Individual and team winners then went on to compete at the state and national level.

The College served as boot camp for more than 30 young adults who participated in the new Aiken Young Marine Program organized by the Aiken Marine Corps League. Participants took part in nine weeks of rigorous survival training while learning military history. The primary intent of the program was to instill discipline in young people who planned to enter the military.

Students of ATC remembered the less fortunate in 2006 with a number of drives, fundraisers and special events. Members of the Student Nurses Association sold pizza, baked goods and drinks in April to raise funds for the Burn Foundation. ATC volunteers, including students, faculty and staff, took part in the National Association of Letter Carriers' Food Drive at the Golden Harvest Food Bank in the spring. College Skills students held a bake sale to raise money for the victims of Hurricane Katrina who were still suffering economic hardships months after the storm. College Skills students also raised money for organizations that aid victims of domestic violence, assisted clients at a local nursing home, and volunteered at a children's shelter.

Willie "Alma" Finnie a local elementary school teacher used the spoken word to empower her audience at ATC's Martin Luther King Jr. observance.

A state-of-the-art drunk driving simulator was set up in the student activities center to demonstrate the dangers of driving under the influence of drugs or alcohol.

ATC's Men's Basketball Booster Club sought new members in 2006. The club helps fund opportunities for student-athletes to encourage academic integrity and exemplary citizenship while performing at a high level of collegiate competition. Three levels of membership are offered ranging from the \$35 a year "Winner's Circle" to the \$500 "All-American" level. These resources help the ATC Knights compete with top NJCAA Division 1 programs and achieve regional and national prominence.

The Massage Therapy program at ATC expanded its clinical massages to include several popular spa days attended by the public. The spas included Swedish massage, hot rock treatments, salt or sugar scrubs, and paraffin hand dips. Available slots were filled almost as soon as each new spa day was announced.

Working in conjunction with the South Carolina Bar Pro Bono Program, ATC hosted a popular "Law School for Non-Lawyers" in 2006 that featured a number of local attorneys as guest speakers. Topics of the six-week program ranged from real estate and landlord-tenant law to criminal prosecution and defense; juvenile justice to estates and probate; health care and elder care to bankruptcy law.

ATC fielded 80 participants for the American Heart Association's Heart Walk at Aiken Regional Medical Centers in the early spring of 2006. The number of walkers was an institutional best and the College raised \$2,700 for the Heart Association during the event.

Faculty and staff exceeded their goal of raising \$7,000 for the United Way of Aiken County by more than \$1,000 in the fall of 2006. Funds were raised through direct contributions, raffles, pizza sales, and a car wash manned by members of the Executive Staff and ATC basketball and softball players.

Popular caricature artist Steve Gipson visited ATC in the fall of 2006 to draw free cartoon portraits of students, faculty and staff. Mr. Gipson, who bills himself as 'the fastest artists ever,' immortalizes his subjects in pen and ink at lightning speed, and has become a regular visitor to the campus.

Students, faculty and staff gathered around the campus flagpole on the anniversary of 9-11 to remember and pray for those lost in the terrorist attacks that struck New York, Washington and Pennsylvania in 2001. The memorial service was led by F. Gregory Rogers and included prayer and a moment of silence.

ATC hosted guests visiting from Russia in the summer of 2006. The Russian delegates learned about the College's mission and toured our facilities. The visit was made possible by Partners in Friendship.

Learning Resource Center

Health & Science Building

A TC hosted regular blood drives for the American Red Cross and Shepard Community Blood Center throughout 2006. Students, faculty and staff could always be relied upon to roll up their sleeves and give the gift of life.

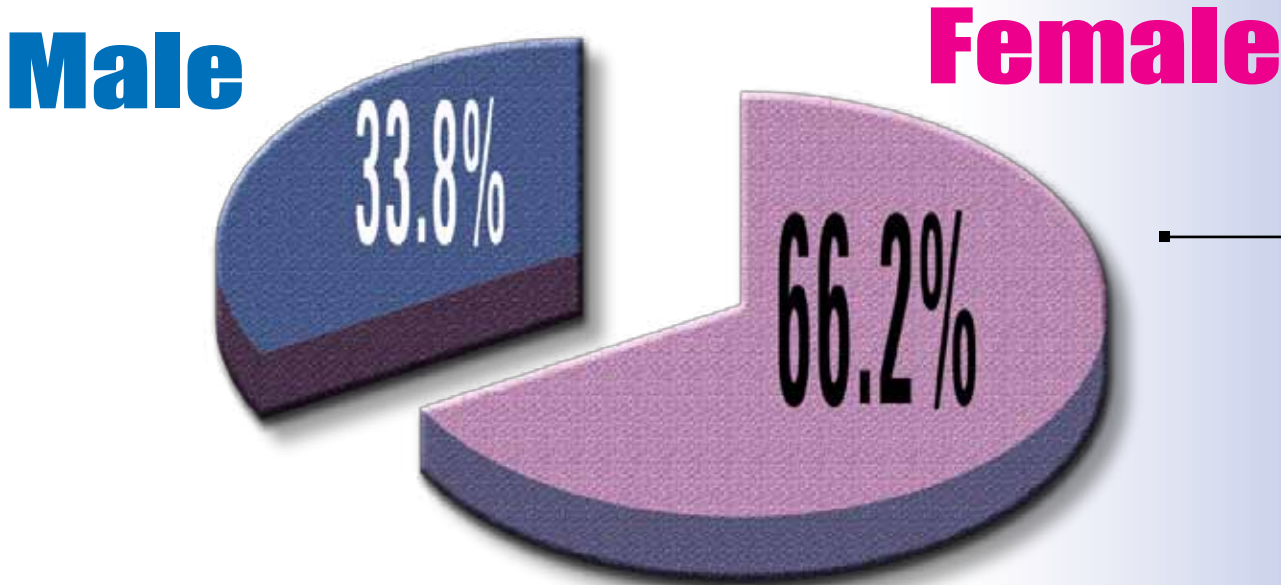

The Aiken Technical College family remembered instructor Frances Smothers in a memorial service held February 27, 2006 in the ATC Amphitheater. They were joined by members of the community — young and old

alike — whose lives Mrs. Smothers had touched in her years of dedicated service. Mrs. Smothers was the program director for the College’s Early Childhood Development department. She served ATC in exemplary fashion for nine years. She passed away at the Veteran’s Administration Medical Center in Augusta on February 23 after a short illness. Mrs. Smothers was survived by her husband, Daryle, and her daughter, Shannon.

“I really value the small class sizes and personal attention I receive here at ATC.”

- Jose Zambramo,
Industrial Maintenance 08

Student
DEMOGRAPHICS
Gender

Maximizing student achievement is our guiding principle. In today's changing economy the need for advanced skills and technical knowledge is essential. We never lose sight of that fact and work to ensure that today's students become tomorrow's success stories.

The ATC Knights men's basketball team clinched the Region 10 regular season championship with a record of 25 and 7 and hosted the District 3 Tournament in the spring of 2006. The tournament included teams from Monroe College of New York, Clinton Junior College of South Carolina, and Allegany College of Maryland, as well as the home team Knights.

Men's basketball Coach Bruce Capers was named the Region 10 Coach of the Year, giving the Knights more to celebrate. Player Christopher (CJ) Martin was named a 2006 NJCAA All-Academic American and a Distinguished Academic All-American.

Recently graduated players also distinguished themselves in 2006. Former Knight Calvin Roland was honored with the inaugural Charles Barkley Scholarship, which is endowed by the 11-time All-Star Hall of Famer. Former Knight Mario Williams then signed to play professional basketball in England for the North Hampton Neptunes.

Dr. Belle S. Wheelan, President of the Commission on Colleges of the Southern Association of Colleges and Schools, served as keynote speaker during May's graduation ceremony. Dr. Wheelan has also served as President of Northern Virginia Community College — the second largest community college in the nation — and as Secretary of Education to Governor Warner's Cabinet. She is the first African American woman to serve as President of the Commission on Colleges.

ATC also honored its Faculty, Staff and Administrator of the Year during the graduation ceremony. Procurement Specialist Toni Marshall (left) was named Administrator of the Year. With 30 years of purchasing experience in industrial, construction and public procurement, she continually strives to improve the campus' purchasing system and works hard to ensure that items needed on campus arrive in a timely manner. She is a Certified Professional Public Buyer. Ms. Marshall has served as President of the Midland Valley Chamber of Commerce. She has also served on the Leadership Aiken County Board of Directors. Kevin McCarthy (center) of the ATC Maintenance Department was named Professional Support Staff of the Year. An ATC graduate, Mr. McCarthy holds a degree in General Maintenance Technology. He regularly takes additional job-related courses and has obtained basic and advanced certificates in HVAC. He has worked in the ATC maintenance department for seven years. Neel Flannagan (right) Department Chair for

ATC's Engineering and Industrial Division, was named Faculty Member of the year. A dedicated educator of more than 20 years, Mr. Flannagan consistently receives high evaluations from his students. He takes care to continually improve his education and earned his bachelor of science degree and his master's degree in education while he was teaching full-time, serving as an excellent example to his students. Active within the community, he is the President of the Rotary Club of Aiken South. He is also a member of the North American Council of Automotive Teachers.

Entrepreneur Carlos Garcia gave fresh inspiration to ATC's best and brightest during Awards Night in the campus amphitheater. A political refugee from communist Cuba, Mr. Garcia started the RCS Corporation by working out of his living room and built a company that earned him recognition from Entrepreneur Magazine, the US Secretary of Energy, and the Aiken Chamber of Commerce, among others. He is a Board Member of the Aiken County Technical Education Commission.

The Academic Success Center hired director Michelle Price, who instituted new programs, including free study skills workshops that taught students how to study effectively and how to improve their memory skills. A number of new tutors also joined the team, including a volunteer nursing tutor.

In 2006, the College secured an Education and Economic Development Grant that allowed ATC and Aiken County Public Schools to expand the "Pathways Grant," which works with local schools to improve senior students' basic math skills. This expansion includes all Aiken County high schools and provides COMPASS testing to high school seniors who want to remediate deficiencies in math, English and reading while still in high school.

Students Charlene A. Kiraly and Christopher J. Martin were among the technical college students named to the Phi Theta Kappa South Carolina All-USA Academic Team. They were recognized in a ceremony at the State House in Columbia. PTK is the international honor society of two-year colleges. Later in the year, ATC student James Burckhalter was a recipient of the 2006 Phi Theta Kappa National Dean's List Scholarship.

Chuck Barber helps ATC students succeed by volunteering in our Academic Success Center. Barber graduated from ATC and went on to earn his Bachelor's degree in mathematics/computer science at USC Aiken.

The Lady Knights won the Carolina's Junior College Conference (Region 10) regular season championship in 2006 with a 12-4 conference record and number one seed in the conference tournament. The team finished with a record of 31 wins and only 10 losses. Three players then went on to play at the four-year university level: Christy McPartlin at Charleston Southern University and Kristen Cochran and Sheena Blackwell at USC Aiken.

A number of ATC staff members earned advanced degrees in 2006. Joel Smith, an administrative assistant in the Workforce and Business Development Division, earned a Bachelor of Science Degree in management of human resources from Bellevue University. Steve White, Operations Manager for Procurement and Auxiliary Services, received his Master of Business Degree with a concentration in accounting from Brenau University. And Library Technical Assistant Parri Wright earned her Bachelor of Science Degree with a concentration in computer science from Limehouse College.

submitted for NJCAA All American Recognition.

The ATC Lady Knights women's fast-pitch softball team hosted their first Softball Invitational in February of 2006. The 6-game round-robin event attracted 10 fast-pitch teams from Georgia, Tennessee, North Carolina, Maryland and South Carolina to Citizens Park in Aiken. The Lady Knights finished a perfect 4-0, beating then nationally ranked Walters State 3-2. Unfortunately the final two games had to be cancelled called due to inclement weather.

Several members of the Lady Knights received honors that were presented at their second annual Awards Banquet. Clytaya Chancellor, Sheena Blackwell, Amber Banks and Chelsea Wheatley were named to the 2006 All-Region 10 Team. Ms. Chancellor was named Region 10 Player of the Year. She and Ms. Blackwell also had their names

Amber Banks, Sheena Blackwell, Clytaya Chancellor, and Chelsea Wheatley were named to the 2006 All-Region 10 Team. Ms. Chancellor was named Region 10 Player of the Year. Ms. Chancellor, Ms. Blackwell and Christy McPartlin were named to the 2006 Region 10/District J All-Tournament Team, and Bekah Gibbs and Brittany Tuten were named to the 2006 Region 10 All-Academic Team.

Dr. Melissa Denardo was hired as the new Vice President of Academic Affairs. Dr. Denardo has degrees from the University of Pittsburgh and Indiana University of Pennsylvania.

100 and 700-800 Buildings

Academic Success Center

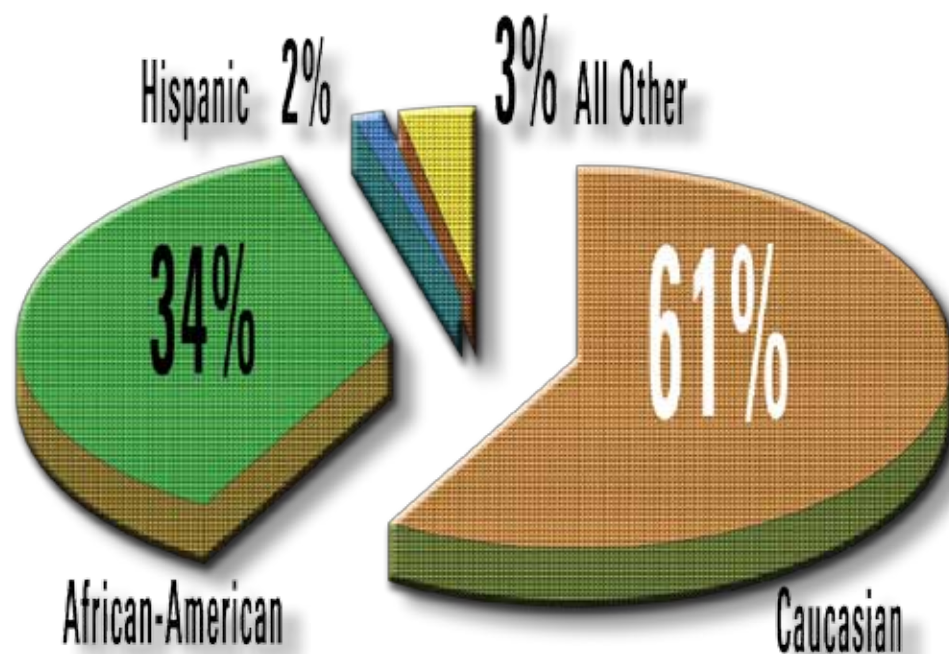

Hollie Deer received the Susan A. Winsor Dedication Award, presented in recognition of outstanding character, commitment to excellence and competitive spirit displayed during the Lady Knights' season.

Congratulations were also due to Women's Softball Coach Rick Wells, who received the Region 10 Coach of the Year for the second year in the row. He attributes his success in part to having an excellent assistant coach in Dave Clark.

Constructive partnerships between ATC and local hospitals and other health care agencies worked to address a statewide health care workforce crisis. Among these partners was Aiken Regional Medical Centers, which awarded three generous Healthcare Sponsorships to students in high-demand programs. Radiologic technology student Crystal McGuire and surgical technology students Ashley Byrd and Jamilee Brown received sponsorships that covered their tuition, books, uniforms and other necessities for completing their programs of study.

"Attending ATC has been a life-changing experience for me. Now I actually feel like I *belong* in school."

Continuous improvement is central to ATC's education philosophy. By always setting high standards, and, once having achieved those, establishing higher ones, we assure that the College keeps moving forward. The result is a first-rate education for our students.

ATC implemented a Minority Men Earning Degrees (MMEDS) program in 2006 under the leadership of Admissions Director Evelyn Pride-Patterson. The program is designed to increase African-American male enrollment and student retention. Students are recruited from local high schools to attend a special summer bridge program to help them prepare for college level work. Later they are mentored to help them progress through their college educations at ATC.

Faculty and staff took full advantage of in-service training opportunities in 2006, including a workshop on the behavioral outcomes of multi-generational poverty. The ATC Diversity Team hosted a Diversity Workshop that focused on inclusiveness, intrapersonal and interpersonal insight, and skill building. The College also held a Faculty Professional Development Week, which included a speech by Dr. Ronald J. Berk of Johns Hopkins University. Dr. Berk showed faculty how humor can be used as a systematic teaching tool to bring course content to life.

The College undertook its first Community College Survey of Student Engagement (CCSSE) that provides information about effective educational practices in community colleges and assists institutions in using that information to promote improvements in student learning and remove barriers that may keep students from continuing their higher education.

ATC completed the reorganization of its Workforce and Business Development Division in 2006, resulting in increased revenue for the College. The Academic Affairs Division also reorganized, resulting in the hiring of Dr. Melissa Denardo, the Vice President of Academic Affairs.

ATC pinned its last LPN class in 2006. The Nursing Department now offers a LPN to ADN Bridge Program that helps Licensed Practical Nurses (LPNs) to complete the transition from practical nurse to registered nurse. The first LPN to ADN transition class admitted its first full-time students beginning in the summer of 2006. This class was merged with the fall 2005 ADN students for completion of the ADN program. The second transition class was admitted in the fall of 2006. These students will join the spring 2006 class for completion of the ADN program.

In response to a statewide shortage of health care providers, ATC launched its Associate Degree in Nursing Program in 2005-06. The Associate of Science, Major in Nursing program admitted its first class in the fall of 2005 with 32 full-time students. Full-time students are admitted twice per year, in fall and spring semesters. Two subsequent classes have been admitted thus far, with 32 students beginning in the spring of 2006 and thirty-two students beginning in the fall of 2006. The program required the hiring of additional faculty. A Health and Science Dean, Dr. Alice Frye, was hired as part of this effort.

Nursing faculty also formed an advisory committee in 2006 composed of clinical agency representatives and representatives from the two area BSN programs. This advisory committee provides feedback on curriculum content and quality, assistance in recruitment of faculty and students, selection of equipment, placement of graduates, guest lecturers, arrangements for clinical sites, and other services to this program.

ATC submitted its first accountability report, as required by the South Carolina State Budget and Control Board. All state agencies, including higher education institutions, must submit an annual report under guidelines anchored to the Malcolm Baldrige Award criteria. The report, intended for review by the governor and the general assembly, ensures continuity in college philosophy from year to year. ATC will use the report to continually review College performance measures and seek improvement where it's necessary.

In preparation for its annual planning process, ATC held a series of listening sessions early in the year with each division of the College. Faculty and staff were encouraged to express their opinions on the many strengths that the College can build upon and the areas that need improvement. Information gathered was used in developing the 2006-07 Annual Plan.

Thanks to a generous gift from the Washington Savannah River Company, ATC installed the same communication software used by many top colleges and universities for student communications. The software, part of the Campus Cruiser CruiserMail Suite, paved the way for online registration, advising, and electronic bill paying, among other features.

Current students expect to be able to do many things online and the College worked to meet this need by completely revamping its Web site. Launched in April, the new www.atc.edu incorporates the most asked for online functions and was designed to be expandable to include new features as they become available. The Web redesign committee was headed up by MPR Director Tom Slizewski and included Walter Busbee, Allyson Davis, Lauren Faulk, Patrick Green, Toni Marshall, Nina Nidiffer and Lynn Weldon.

Freshman softball scholarship winner Sam Mims is taking her game to the next level at ATC after excelling at Strom Thurmond High School in Edgefield.

ATC updated its logo and slogan to better communicate our modern sensibility and emphasize our mission of helping people start achieving their education goals no matter where they are in their lives or careers.

Shortly after the new Web site launched, students, faculty and staff gained access to "My ATC," a web portal that provides a free and secure e-mail account, as well as personal tools such as calendaring, file storage and task management. This was made possible by a plan developed by the Campus Cruiser Project Team, consisting of Hank Arnold, Paul Callahan, Lynn Rickabaugh, Dawn Butts, Lauren Faulk and chairman Rich Weldon.

ATC held an Adjunct Faculty Job Fair in the summer of 2006 in the Community Room of the Health and Science Building. The College recruited for adjunct faculty positions in a variety of program areas in both the Academic and Workforce and Business Development divisions.

Thanks to the Partnerships Among South Carolina Academic Libraries (PASCAL), ATC students gained access to Lexis Nexis in 2006. This incredibly comprehensive database provides full-text documents from more than 5,900 news, business, legal, medical and reference publications with a variety of flexible search options. Among the many available resources are national and regional newspapers, wire services, broadcast transcripts, international news and non-English language sources, business news journals, U.S. Federal and state case law, and much more.

ATC hired Mike Duncan to serve as facilities engineer in 2006. He began implementing new processes, procedures and assessments that ensure that maintenance plans run smoothly and the campus stays in good repair.

Repairs were made on the 900 Building's roof in 2006. The structural work under the canopy was painted and entry-way sidewalks were replaced. Minor repairs were also made inside the building.

Plans were completed for a major renovation of the 100/200 Building that will be completed by the end of 2007. Renovation will begin in early 2007 and include new flooring and ceilings in the classrooms, classroom technology and lighting upgrades, and fresh paint and carpeting.

ATC Today, the campus' bimonthly electronic newsletter launched a new look in 2006. The newsletter is now interactive, in full color, and features personal, motivational stories of

WWW.ATC.EDU received a complete redesign in 2006. Our new Web site is packed with forward-looking features and functions, including an interactive calendar, online application and dozens of new pages for academic, sports and administrative programs.

Gymnasium and H&S Bldg.

Student Activities Center

students, faculty and staff, as well as campus news, events and photographs.

Month of the Young Child was held in the spring of 2006, with a variety of activities held throughout the month. Aiken Technical College joined other agencies such as Aiken County First Steps, the United Way of Aiken County, Success by Six, Children's Place, Aiken Center for the Arts, the Tri-Development Center, Childcare Resource and Referral, Head Start and others to bring attention to the importance

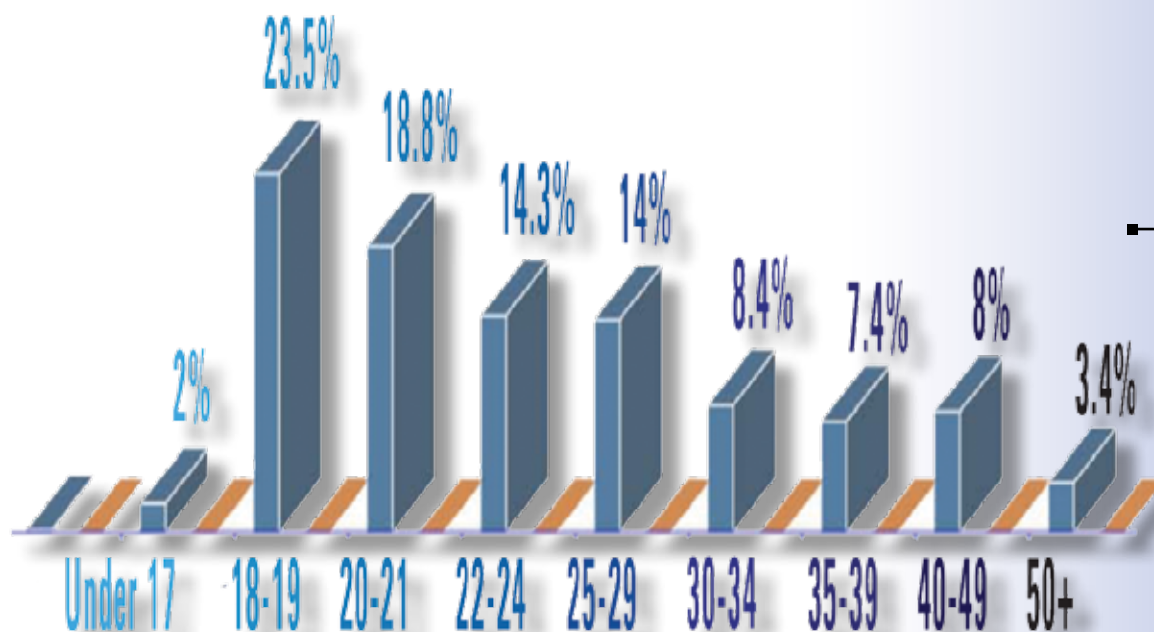

of early childhood education. ATC held the first event, a curriculum training workshop for childcare providers. Representative Roland Smith read a proclamation supporting Month of the Young Child at ATC prior to the workshop.

Preparations continued in 2006 to upgrade the campus Datatel system to R-18. The new cohort is set to go live in the spring of 2007.

"The knowledge I've gained at ATC will greatly enhance my career."

Age

Economic development is essential for the creation of jobs and prosperity in our community. It is the reason we continually re-evaluate our programs and align them with the needs of area employers. Maximizing opportunities for our students, business and industry results in increased quality of life for everyone.

An economic impact study released in 2006 confirmed what faculty and staff at ATC have worked so hard to achieve: The presence of the College is one of the primary reasons new and existing businesses invest in the ATC service area. Focus groups results within the study further indicated that two of the top four factors influencing capital investment within the ATC service area included the availability of skilled labor and the quality of worker training programs available through the College's academic offerings and its Workforce and Business Development Division.

The ATC Foundation hosted an annual Joint Chamber Business after Hours in the Health and Science Building. More than 100 guests were treated to a fun reception and fellowship. Massage therapy students were on hand to give guests a chair massage. Attendees were from the three area chambers: Aiken, Midland Valley and North Augusta.

Our Workforce and Business Development Division hosted its eighth annual Business and Industry Luncheon in 2006 to celebrate ATC's partnership with companies throughout the Central Savannah River Area. Dr. Jeffrey M. Stanton, an associate professor in the School of Information Studies at Syracuse University, served as guest speaker. He is the author of *The Visible Employee: Using Workplace Monitoring and Surveillance to Protect Information Assets — Without Compromising Employee Privacy or Trust*.

The Bridgestone Firestone Aiken County Facility received the South Carolina Silver Crescent Award for Manufacturing Excellence in the large manufacturer category in 2006. Established in 2002, the Silver Crescent recognizes outstanding manufacturers in the state based on their economic impact, commitment to the workforce, and involvement and contributions to their communities. The Aiken County plant was nominated for this prestigious award by ATC in recognition of Bridgestone Firestone's strong, continuing support of education and economic development initiatives within the CSRA.

Monsanto generously supported the purchase of two site licenses for a Process Simulation Package in 2006 that will be used by students training in ATC's chemical operations program.

The South Carolina State Board for Technical and Comprehensive Education commissioned a study by Omega Associates, LLC, which was completed in December 2005. Its report released in 2006 showed that for fiscal year 2004, state and county funding for ATC totaled \$8.84 million. For every dollar of state or county funds provided ATC, the area received \$11.39 in additional benefits.

ATC joined Community Partners in 2006 to assist the local workforce struggling with the closure of Avondale Mills. ATC, Aiken County Adult Education, the ATC One Stop Career Center, Our Lady of the Valley Catholic Church, the Aiken Housing Authority, and the Lower Savannah Council of Governments worked together to offer courses at ATC, including instruction in automotive technology, construction, retail certification and more. The programs were designed to help displaced workers find gainful employment as quickly as possible. In some cases, financial assistance to further aid displaced workers find training was available through the Lower Savannah Workforce Investment Area's WIA programs.

New tests became available at the ACT Test Center in 2006. Automotive Service Excellence Testing covered such topics as 'auto,' 'collision,' and 'service consultant,' among others. Cosmetology Certification Testing gave cosmetology candidates an opportunity to take the South Carolina State Board of Cosmetology Certification Examinations at a site close to home. And those interested in becoming airport screeners could take the Transportation Security Administration Exam.

Associate Vice President of Workforce and Business Development Dr. Gemma K. Frock served as one of three keynote speakers for the American Association of Women in Community Colleges. At the same conference, WBD's Resource Coordinator Amy Marchant received professional development funds that will help her continue her education.

Dr. Gemma Frock also spoke at the Siemens Conference in 2006. She gave a presentation on chemical operations training at ATC.

DSM Chemical and Shaw Industries created a joint venture in 2006 which will permit the companies to recycle carpeting. ATC joined the effort by training more than 60 operators for the project.

The area's nursing shortage attracted Megan Zaepfel to the program and she plans to work in an area hospital after she graduates in the Spring of 2007.

WBDD held a graduate recognition ceremony in the spring of 2006 to honor the dedication shown by its students. Division VP Dr. Gemma Frock introduced the keynote speaker, Samuel R. Jordan, Workforce Development Administrator with the Lower Savannah Council of Governments.

ATC worked with human resources groups in Augusta in 2006 to identify critical job areas that will soon become vacant as employees retire. The information will become the base of a plan to recruit and train workers who can fill those positions as they become available.

Inspectors Bootcamp, LLC, partnered with ATC to provide fire alarm panel training to a national audience. Two classes attracted students from

across the nation to train in our FAST Lab.

The first Administrative Professionals Seminar and Luncheon was held in the early spring of 2006. The event hosted by the Workforce and Business Development Division featured three speakers, including Ann Taylor, chair of the Taylor Auto Group, and motivational speaker Margie Taylor. John Hart of WJBF Channel 6, served as the master of ceremonies.

ATC's Workforce and Business Development Division held a recognition ceremony in the spring of 2006 to honor the hard work and dedication students displayed as they furthered their careers through training and education. Samuel R. Jordan, Workforce Development Administrator with the Lower Savannah Council of Governments, served as guest speaker. A second ceremony featuring Robby Bowles, administrator of the Carriage Hills Living Center, was held before the 2006 winter holidays.

The Center for Accelerated Technology Training joined with ATC in 2006 to meet a growing demand for welders in the Central Savannah River Area. A non-credit dedicated welding space on the ATC campus now accommodates both aluminum and steel welding. A number of companies, including TTX, BAE, Bridgestone Firestone and Kendall Healthcare have already taken advantage of this program to train their workers in this high demand skill.

Steve Simmons, Director of Sales in the Workforce and Business Development Division, was recognized at the LERN Conference in 2006 for completing his Certified Program Planner in Contract Training. LERN is the national continuing education training organization.

Parsons partnered with ATC in 2006 to run corrosion tests on an air pulse agitator. Information gathered in the tests will assist Parsons as it starts up its new facility at the Savannah River Site.

WBDD hosted a one-day professional development program — Team Creativity, Disney Style — to help area business professionals learn how to foster creativity and everyday innovation in their organizations.

900 Building

Manufacturing Technology & Training Center

Liz Pulver, an instructor of industrial, environmental and mining safety at ATC was recognized by Aiken County Emergency Services in 2006 for her work with Aiken HAZMAT during the Graniteville train derailment of January 2005.

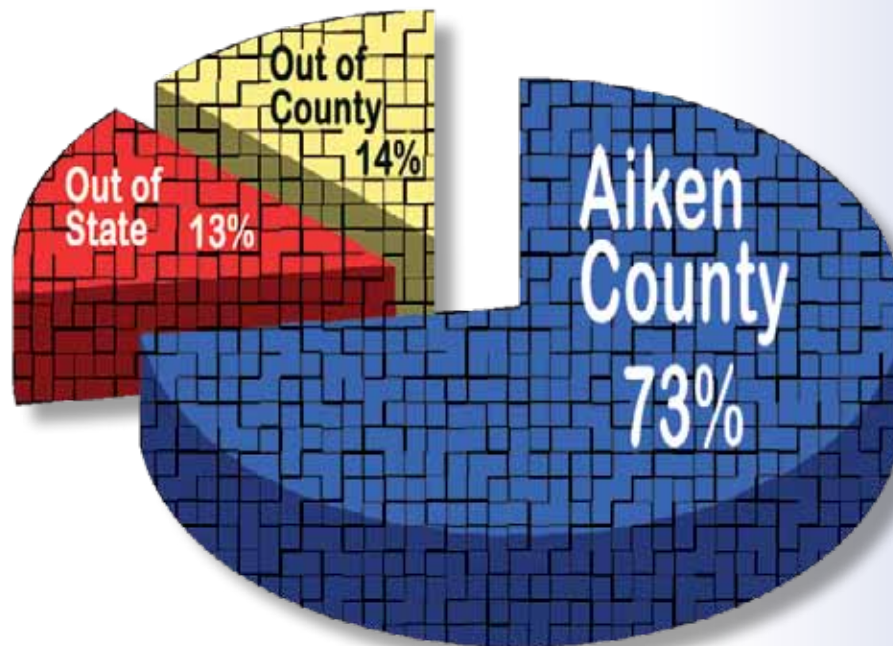

ATC joined with multiple community service agencies that banded together to assist employees who lost their jobs with the Avondale Mills closings in 2006. The College offered

WorkKeys Fundamentals and WorkKeys testing at a transition center in the city of Aiken, where employees could determine their best options for future employment and take the appropriate steps to gain further education or training. The One Stop Career Center also took part in this effort. ATC is in the process of expanding these much-needed services in 2007.

"ATC prepared me to meet head-on the workload I am now experiencing at a four-year university."

Director's Letter

For first generation college attendees and for students seeking more affordable higher education, Aiken Technical College is a first chance and the pathway to self and economic improvement. From displaced workers, employees seeking to up-grade their skills, and those students looking to start their college career close to home, Aiken Technical College is an excellent choice.

Aiken Technical College has been a part of the fabric of this community for 34 years and has helped tens of thousands of students obtain their dream of higher education. Together the college and the Aiken community have grown and diversified, welcoming new businesses and industries, and supporting existing operations with educational programs that promote success. This partnership has been a catalyst for the tremendous economic development in our area.

Private giving helps make it possible for the College to transform the lives of those who are touched by its teaching and public service. Student scholarships, money for faculty and staff professional development, funds for instructional equipment, technology enhancements and state-of-the art classrooms are a few of the ways private dollars are used on campus.

Every year ATC benefits from the generosity of hundreds of contributors. Their reasons for giving vary as widely as their interests and their financial circumstances. What they all have in common is the desire to help strengthen the college and uphold the academic excellence that is essential to its success. If you share that desire, you will want to support the Aiken Technical College Foundation. Our future growth and the community's growth depend on people like you. Ultimately, we strive to enhance the opportunities at ATC as we work toward fulfilling the college's goals. Our continued success depends in large part on the generosity of the community. All gifts are greatly appreciated by those we serve.

A handwritten signature in black ink that reads "Mary Kay Commons".

Mary Kay Commons, Director
Aiken Technical College Foundation

Bob Pedde with Washington Savannah River Company presented two \$50,000 checks to Dr. Susan Winsor for Campus Cruiser Software and funds to support the ATC Foundation Endowment.

To date the 2006 Drive for Excellence, Annual Giving Fund, has raised more than \$26,000 for the Foundation's Unrestricted Trustee Endowment.

The ATC Foundation held its sixth annual Scholarship Benefactor/Recipient Breakfast in January to recognize the generosity of many scholarship benefactors and introduce them to their scholarship recipients. More than 100 people attended this special event.

The Hospital Auxiliary of Aiken County contributed \$4,000 to the ATC Foundation Scholarship program for students enrolled in radiologic technology, surgical technology, associated degree nursing and dental assisting.

The ATC Employee Giving Campaign was a great success. This year's theme was "Framing the Future for Our Students." The month-long campaign raised awareness of the Foundation's priorities and goals. This year employees were asked to help fund student book scholarships. Students received a certificate with their scholarship amount and donor name.

Carol Faust Spencer, an adjunct faculty member in the nursing department, established a \$1,000 "Nurses are Blessed" scholarship for associate degree nursing students.

The Hydrangea Society of the CSRA established a \$1,000 scholarship for a deserving full-time student, with a minimum 3.0 GPA. Club members raised funds for this scholarship during their first annual hydrangea plant sale.

Faculty and staff established a book scholarship in memory of faculty member Frances Smothers who was coordinator of the Early Childhood Development Program. This gift was gratefully received and is a fitting tribute of honor.

The Fraternal Order of Police, CSRA Lodge Number 6, established a scholarship in memory of Edward J. Kaney. This scholarship will be given to a student majoring in criminal justice and who is an Aiken County resident.

A new board member was inducted by the Aiken Technical College Foundation Board of Trustees. Tracy Riley, Human Resource Manager with Kimberly Clark came aboard in January. Board member Mary Commons became a Greater Aiken Chamber of Commerce Ambassador in 2006.

The ATC Foundation Board of Trustees held a retreat at Misty Lake on October 18, 2006. Seventeen board members gathered to learn more about the college's mission, vision, values and goals and how they will play an integral part in cultivating new donors to the Foundation.

Each year the Foundation allocates \$10,000 toward the faculty/staff professional development. Resources are used to augment ongoing actions or to

support individual or group activities that could not be supported through normal funding channels through the college such as training or certification needed to start new programs at ATC, or to support the implementation of new technology or other new initiatives. Recipients for 2006 included:

- **Corine McCarthy**, biology instructor, to attend Facilitating Learning Online (FLO). This course gives on-line instructors the opportunity to improve their teaching skills for on-line, distance learning classes. It helps to improve distance learning approach for the enrichment of student education.

- **Don True**, Director, Accounting and Financial Analysis, attended a SCACPA Non Profit Workshop to receive updated information on national accounting standards relating to the accounting principles to the ATC Foundation's financial records and statements.

- Nursing instructors **Jody Madden** and **Donna Goins** attended the National League for Nursing Education Summit in New York City, the premier conference for nursing instructors in the United States.

- **Tracy McAfee**, speech instructor, attended the Carolinas Communication Association Annual Conference "Communication, Culture & Common Ground."

Washington Group International CEO, Steve Hanks, presented Dr. Susan Winsor with a \$40,000 check for the ATC Foundation Endowment Fund. The amphitheater located in the 700-800 building was named in honor of Washington Group International.

- **Nina Nidiffer**, public information specialist, **Michelle Price**, director of the academic success center and **Katherine Fowler**, director of placement services, were selected to serve under the leadership of the Resource Development Office to develop a grant writing team to scan, select and develop grant submissions to support the strategic initiatives of the College. These three individuals attended a Grants Writing USA Seminar in Columbia for two days to develop grant writing techniques.

- ATC General Education Division sent a team of five instructors to the South Carolina Developmental Education

ATC employees donated money to help our students afford books. The campaign raised over \$20,000 with a 96% employee participation rate.

Conference in November. The conference, Technology and Tradition: Balancing the Mix in 2006, will help the team evaluate the possible uses of Plato, a computer-based learning system for remediation in math, reading and English.

Mary Commons, director of the ATC Foundation was named Rotarian of the Year by the Rotary Club of Aiken South. This is her second award. Her first award was received during 2001-2002.

During the year, the ATC Foundation hosted numerous clubs and organizations for breakfast, lunch and dinner to showcase the many new buildings, programs and activities of the College.

Cash Canada, City Bank President of Wachovia Bank, was inducted as the new Foundation Chairman, succeeding Pat Cunning who had served for seven years as board chairman.

The 11th Annual ATC Friendraiser Golf Tournament held on October 8th at Woodside Plantation's Cupp Course was a big success. Over 100 golfers participated in this event held to thank donors for their support of Aiken Technical College. Pictured is the Bridgestone/Firestone SC team (l to r): Tom Nance, Michael Darr, Dr. Susan Winsor, Mike Uhle and Guy Hoffman.

The ATC Foundation

Mission

The Aiken Technical College Foundation will undertake activities to acquire and manage resources that will facilitate the fulfillment of the mission and goals of the College, while strengthening positive community relationships.

Vision

To be the preferred community non-profit organization of private and corporate donations which are viewed as an investment in the College and the economic development of the region.

Goals

1. To connect with the community to raise awareness of the College by assisting and encouraging partnerships between individuals, business and industry.
2. To generate and provide resources to meet the College's needs and help fulfill its mission.
3. To be recognized as a philanthropic leader in maximizing donor investments that enhances economic development and quality of life in the region.

The ATC Foundation's current priorities include:

- Providing scholarships to students.
- Constructing connections to the community.
- Researching, identifying and accessing fund-raising resources in support of the long-range plans of the College.
- Meeting critical College needs that cannot be addressed through the College's normal operating budgets.

Scholarships

At the beginning of the Fall 2006 semester, the Aiken Technical College Foundation awarded 121 scholarships to deserving students to pursue their dream of higher education. This was possible due to the generosity of many individuals and organizations in our community who endow or sponsor these scholarships. Twenty-two additional scholarships will be awarded for the Spring 2007 semester.

**Scholarship Spotlight****Jonathan Foussat
Automotive Technology**

Jonathan Foussat is passionate about cars, so much so that he studied automotive technology for two years at the Aiken County Career and Technology Center. But once he finished there, he wondered how he would continue his education.

"I wanted to go to college while staying close to my family," he said. "Aiken Technical College was right here at home, but I couldn't afford to go."

Then he was offered a pair of scholarships, and his life changed. "If I hadn't received the scholarships, I wouldn't be here," he said. "But in a way, that's the best part about coming to ATC. Knowing that someone has so much faith in my ability to succeed encourages me to work hard."

Jonathan is now studying automotive technology at ATC. He anticipates graduation in 2008. "It had to be cars for me," he said. "It was my choice. And ATC made it possible."

Scholarship Spotlight

Candy Russell Nursing

Candy Russell earned her first nursing degree from ATC in 2003. Now the hospice nurse has returned to pursue her Associate Degree in Nursing.

She will do this while continuing her full-time job with Southern Care and taking care of her family. "I want to further my education," she said. "It will help me assist my hospice patients in a more productive way."

Candy chose to go into hospice care after writing an essay that required her to interview hospice workers. "It's a calling," she said. "I just knew that I wanted to help the dying and their families that remained behind."

But learning is a life-long experience and Candy is excited about being back in the classroom again. "I don't take my education for granted," she said. "I want to help other people, not just through my nursing skills, but by giving them a part of myself. My education helps me do that."

FRAMING THE FUTURE...

... **was** the Aiken Technical College Foundation's theme for this year's annual giving campaign. The objective was to show students that the community shares in their goals of developing career skills and transitioning into the workforce. The various grants, scholarships and Buy-A-Book programs funded through the generous donations of those listed here allowed many students to stay in school, increase their skills, and continue building a vision of their successful futures.
